

VIKAS JAISWAL

Java Backend Developer | Spring Boot · REST APIs · JWT · Azure-Certified

Santacruz, Mumbai, Maharashtra – 400055 | +91 8291519911 | [Email](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Backend developer with 4+ years building production Java systems across FinTech, EdTech, Healthcare, and Logistics. At WEQ Technologies, I own backend architecture for a live algorithmic trading platform — Zerodha Kite Connect integration, real-time WebSocket market feeds, and Razorpay payment flows. Before that, at Medify Nexus, I redesigned healthcare database schemas and cut API integration time 40% with JWT-based auth. Comfortable owning a feature end-to-end, from schema design to the API that ships it. Azure-certified (AZ-900, DP-900).

TECHNICAL SKILLS

Languages & Core: Java 8+, Java 17, Core Java

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate

API & Integration: REST APIs, Swagger/OpenAPI, Postman, Webhooks, WebSocket (STOMP)

Security: JWT, OAuth2, RBAC, @PreAuthorize, Parameterized Queries

Databases: MS SQL Server, MySQL, JPA, JPQL, Stored Procedures, Query Optimization, Indexing

Cloud & DevOps: AWS S3, AWS Parameter Store, CI/CD, Maven, Git, GitHub

Performance & Concurrency: Multithreading, @Async, Streams API, Lambda Expressions, Spring Scheduler

Third-Party SDKs: Zerodha Kite Connect, Razorpay, 100MS SDK, FCM V1, WhatsApp Business API (Aisensy), iText7

Practices: SOLID Principles, Design Patterns, Agile/SDLC, DDD

EXPERIENCE

Software Developer — WEQ Technologies

Jul 2025 – Present | Mumbai

- Own backend architecture for a live algorithmic trading platform, integrating Zerodha Kite Connect for broker OAuth and real-time WebSocket (STOMP) market data feeds
- Built the trade management system — entry, exit, stop-loss, and bracket orders — with webhook-driven status sync back to the client
- Broadcast live stock ticks to thousands of concurrent users through a Spring Scheduler market-data pipeline
- Migrated date/time handling to the Java Time API across 30+ modules, standardizing IST timezone logic platform-wide
- Set up centralized notifications across FCM V1, WhatsApp Business API (Aisensy), and SMTP, dispatched asynchronously with @Async
- Enforced granular RBAC with Spring Security and @PreAuthorize, and replaced HQL concatenation with parameterized queries to close an injection risk

Database Engineer and Backend Developer — Medify Nexus

Jan 2024 – Jul 2025 | Mumbai

- Designed and deployed RESTful APIs with Spring Security and JWT authentication for a healthcare platform handling sensitive patient data, cutting integration time by 40%
- Boosted API throughput 30% and cut latency by 150ms by moving hot paths to multithreaded, async processing
- Automated ETL pipelines to transfer and cleanse health records, cutting manual effort by 80%
- Redesigned MS SQL Server schemas across 10+ modules around domain-driven design principles
- Introduced composite indexing that doubled report generation speed
- Locked down access with header-based authentication and externalized runtime configuration outside the codebase

Associate Software Engineer — Wipro Pvt Ltd

Feb 2022 – Jan 2024 | Mumbai

- Built and maintained backend services in Java, Spring Boot, and Hibernate as part of a 7-person Agile team
- Revamped SQL queries and schemas, improving performance by 30%
- Delivered 15+ RESTful APIs consumed by the front-end, from spec through code review and release
- Ran peer code reviews and joined design discussions to keep the codebase consistent and maintainable
- Worked the full SDLC — requirements, design, build, test, deploy — coordinating with QA and DevOps at each release

EDUCATION

B.Sc. Computer Science — NMFC College, Mumbai (2018–2021) | CGPA 7.78/10

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) · Microsoft Certified: Azure Data Fundamentals (DP-900) · Introduction to Generative AI — Google Cloud
